

Save Money on ORTHODONTIA

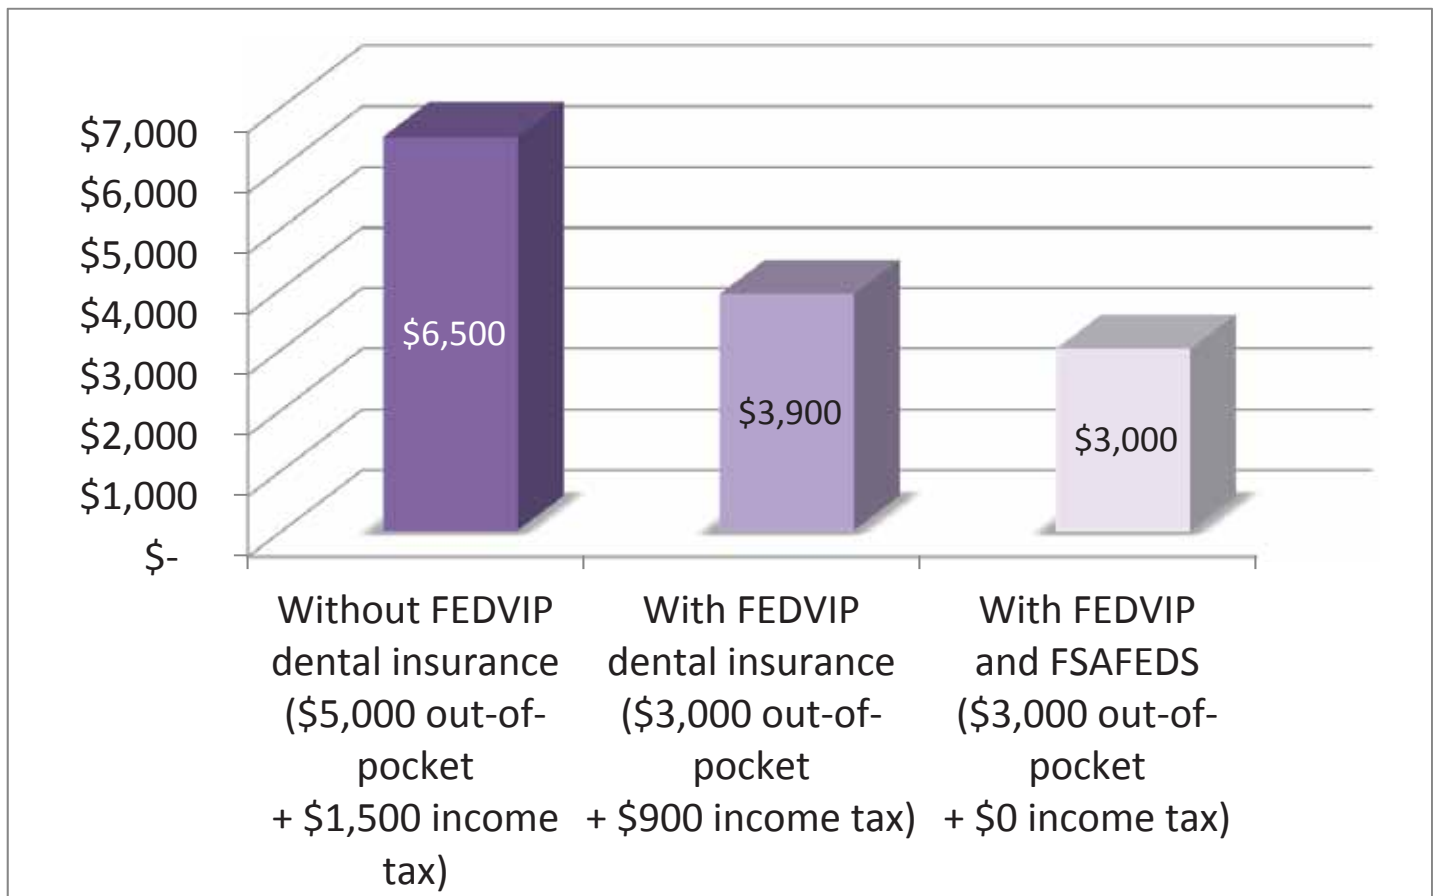

Braces are expensive. Your FEDVIP dental plan can help you pay for them, and most plans cover about 50% of the cost on average, up to a maximum of about \$2,000. For the other 50% and anything over \$2,000, consider another Federal benefit that can help make braces even more affordable.

Thousands of Federal employees save on orthodontia with the Federal Flexible Spending Account Program (FSAFEDS). With FSAFEDS, the income you spend on braces and many other health care expenses is **tax-free**. Not paying taxes on the money you spend at the orthodontist, for most employees, is like a **30% discount on braces**.

FEDVIP and FSAFEDS – Working together to save you money on braces.

Estimated Cost for \$5000 Orthodontia
